

LNG bunkers: We' got a case

Juan Carbayo
Cepsa Gas

8th May, 2017

LNG Bunkers Merge two distant industries:

But :
Small Scale & 'Cold' Vessels involve an extra CAPEX
How Bridging this GAP?

How to tackle the Challenge?

Through a Strong **Coordination** and **Cooperation** between stakeholders:

- i. To **climb faster** the “learning curve” so as to reducing costs
- ii. But **each Company/Stakeholder assuming** full responsibility for **their** business **Risks**

Added Value by LNG Bunker Suppliers:

Security of Supply through a diversified LNG portfolio

Willing to **assume** our own **PRICE** risk

Thank You
